AMIN FALLAHZADEH

Front-End Developer | React.js/React Native Developer

✉ amin.dev.tech@gmail.com | 📞 +90 536 286 10 89 | 🐙 | 💼

SUMMARY

Dedicated Front-End Developer with more than 5 years of experience creating responsive and intuitive web applications. I'm big on staying updated with the latest best practices straight from the official docs, and I love focusing on the little details that make a big difference. Most of my experience has been working in teams and in agile platforms and frameworks like scrum.

EXPERIENCE HIGHLIGHT

Retirement Organization | Portal for Municipality of Tehran

- **Technologies Used:**
    - **Frontend:** React, Material-UI, Emotion, Redux Toolkit, React Router, React Hook Form, Vite.
    - **Data Management:** Material React Table for handling extensive data grids from the backend.
    - **Form Handling:** React Hook Form for managing complex and numerous forms efficiently.
    - **Additional Libraries:** Moment.js for date manipulation, PDF-lib for handling PDFs, File Saver for file saving functionality.
- **Key Responsibilities:**
    - Designed and implemented the entire frontend architecture and user interface.
    - Integrated multiple APIs to fetch and manage data.
    - Ensured the application is fully responsive and accessible.
    - Collaborated with backend developers to align API integrations and data flow.
    - Utilized various React libraries to enhance UI/UX and improve performance.
    - Conducted thorough testing and debugging to ensure high code quality and functionality.

Other Projects: Danger Management Portal | IKEEPER a telegram mini game | Post.ir Android app
